

IMAGES + TEXT

INTRO TO GRAPHIC DESIGN

1. Placing Images

File >

Place (ctrl + D) >

Find image that you want to place in files

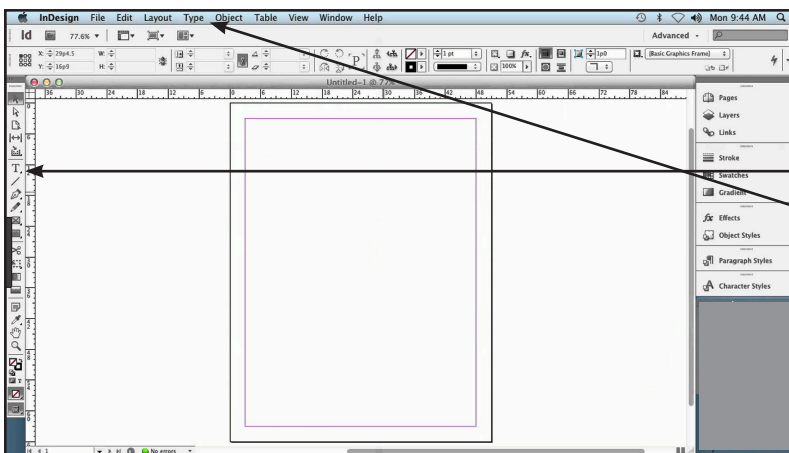

Click and place

Click the "target" symbol in the middle of the image or use your direct select tool (white arrow) to select the image INSIDE of the bounding box.

Right click > Fitting

Select > Fill frame... or Fit frame

2. Text Tool + Text Wrap + Placeholder Text

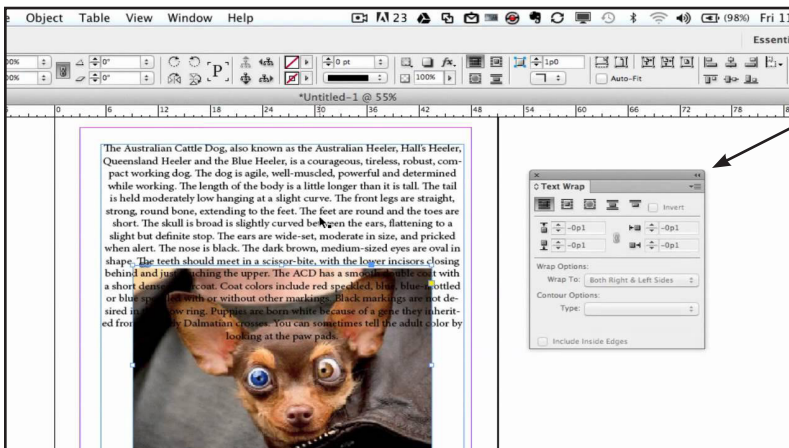

Text tool

The application bar (bar on the top of your workspace) will change to all of the text options: change fonts, size, color, paragraph, etc.

Placeholder text

Type > Fill with placeholder text*

Use to quickly fill up columns with text

If not in your panels

Window > Text Wrap > Select

A new panel will come up with various options to use

Text wrap will enable you to "wrap" your text around an object and/or image
